

Good afternoon parents and guardians,

I hope everyone is having a splendid day! Our school (as well as other schools in Broward County) are using Canvas as an educational tool and a way to provide student access with key class information.

Canvas is a great source and colleges/universities are starting to implement this site as well.

Many classes will have student's complete quizzes, discussions, and assignments through this site in order to prepare students for high school and higher education. Parents are able to create a parent account and link themselves to their student.

Linking your parent account to your student will allow you to see **ALL** the teacher's quizzes, assignments, notes, discussions and other resources that your student teachers have posted.

If interested in linking your account, please follow the steps below.

There are two options:

Option 1	Option 2
1. Have your student log into their Canvas account	1. Create Account <a href="https://canvas.instructure.com/enroll/CEXETR">https://canvas.instructure.com/enroll/CEXETR</a> .
2. Click "Account" (left hand side, under the Canvas Symbol)	2. I will connect you from my end.
3. Click "setting"	<b>Note: It might take me a few days to link you, especially if the last names are different.</b>
4. Click "Pair with Observer" (left hand side, the third option)	
5. Write down the code	
6. Create Parent account <a href="https://canvas.instructure.com/register_from_website">https://canvas.instructure.com/register_from_website</a> <ul style="list-style-type: none"> <li>• In big letters it will say "Sign up no, it's free"</li> <li>• Click "Parents sign up here" (it's under the blue and green signs)</li> </ul>	
7. Fill out the information <ul style="list-style-type: none"> <li>• Your Name</li> <li>• Your email</li> <li>• Password</li> <li>• Re-enter password</li> <li>• Student pairing code (steps 3 and 4)</li> </ul>
